Live Interview Agent

Conducts live AI-led SME interviews using the approved interview guide, capturing responses and probing for depth before handing off to process mapping.

CONCEPT

SCOPE

PURPOSE

- Conduct live SME interviews autonomously using the scoped interview guide from Agent 1.
- Enable more interviews to be completed faster and at lower cost than human-led interviews.
- Capture and structure responses in real time for downstream process mapping.
- Probe for specific past behaviors, exceptions, and workarounds beyond surface-level answers.
- Flag thin or incomplete responses for human escalation.

DESIGN PRINCIPLES / GUARDRAILS

- Never lead the witness — ask open-ended questions only.
- Always probe for specific recent past examples, not hypothetical opinions.
- Escalate to a human interviewer if the SME is unresponsive or responses are consistently thin.
- Never fabricate or infer answers not explicitly provided by the SME.
- Maintain a professional, consultative, and adaptive tone throughout.

KPIS / SUCCESS MEASURES

Interview completion rate 85%+	Response depth vs. human-led interviews ≥80% parity
Follow-up flag accuracy 90%+	Time saved per interview cycle –60% vs. manual

DESIGN

HOW IT WORKS

5-step workflow

1 Load Guide Ingest approved interview guide and SME context from Agent 1. ↓ Retrieval layer / interview guide input	2 Initiate Conversation Open interview and establish context with the SME. ↓ LLM conversational engine
3 Ask & Probe Work through questions and probe for depth on shallow or vague responses. ↓ Adaptive questioning logic	4 Detect Completeness Assess topic coverage and flag gaps or unanswered areas. ↓ Coverage scoring engine
5 Summarize & Hand Off Produce structured transcript and summary for process mapping. ↓ Human review + export	

INPUTS

5

▶ Approved interview guide (from Agent 1)
▶ SME name, role, and seniority
▶ Interview parameters and time constraints
▶ Known hypotheses and focus areas
▶ Prior interview context if available

OUTPUTS

5

◆ Full interview transcript
◆ Structured response summary by topic and workflow
◆ Flagged follow-up items and gaps

- ◆ Coverage assessment against interview guide
- ◆ Export-ready interview record

APPLICATION INTEGRATIONS

4

- ⇒ Interview Scope Agent (Agent 1) — Receives approved interview guide as primary input
- ⇒ Process Mapping Agent (Agent 3) — Passes transcript and structured summary for workflow conversion
- ⇒ Communication platform — Delivers interview via chat, email, or web interface
- ⇒ Internal knowledge base — Pulls prior interview context and benchmarks
