Value Modeling Agent

Sizes the financial and operational opportunity for each improvement initiative, producing model-ready business case outputs with explicit assumptions and sensitivity ranges.

CONCEPT

SCOPE

PURPOSE

- Estimate financial and operational value for each improvement initiative.
- Pull factual data requirements surfaced by Agent 1 to anchor value estimates.
- Produce model-ready outputs with explicit assumptions and sensitivity ranges.
- Accelerate business case development while maintaining analytical credibility.
- Flag data-thin estimates for additional human scrutiny.

DESIGN PRINCIPLES / GUARDRAILS

- Always show assumptions explicitly — never bury them.
- Provide ranges not point estimates to reflect uncertainty honestly.
- Anchor every estimate to a specific initiative and pain point.
- Flag estimates with thin data support for human review.
- Never present a value estimate without a stated confidence level.

KPIS / SUCCESS MEASURES

Estimate accuracy vs. final business case
±20%

Time to first value model
–70% vs. manual

Assumption coverage rate
95%+

Data-thin estimates reviewed by human
100%

DESIGN

HOW IT WORKS

5-step workflow

1 Ingest Initiatives

Load approved initiatives and fact-base requirements from Agents 1 and 4.

↓ Retrieval layer

3 Apply Estimation Logic

Build per-initiative value model with explicit assumptions.

↓ LLM + financial modeling logic

5 Human Review

Analyst validates assumptions, fills data gaps, and approves estimates.

↓ Human review + export

2 Pull Benchmarks

Source relevant industry benchmarks and client proxies.

↓ Benchmark retrieval engine

4 Sensitivity Analysis

Generate value ranges and flag assumption sensitivity.

↓ Sensitivity engine

INPUTS

5

- ▶ Approved improvement initiatives (from Agent 4)
- ▶ Factual data requirements (from Agent 1)
- ▶ Process metrics and volume data
- ▶ Industry benchmarks and comparables
- ▶ Client financials or proxy data

OUTPUTS

5

- ◆ Per-initiative value estimates with ranges
- ◆ Assumption documentation
- ◆ Sensitivity analysis

- ◆ Business case summaries
- ◆ Model-ready export for financial review

APPLICATION INTEGRATIONS

4

- ⇒ Future State Agent (Agent 4) — Receives approved initiatives and build plans
- ⇒ Interview Scope Agent (Agent 1) — Pulls fact-base requirements list
- ⇒ Internal knowledge base — Benchmarks and prior engagement value cases
- ⇒ Execution Roadmap Agent (Agent 6) — Passes value estimates for roadmap prioritization
