Execution Roadmap Agent

Scores and sequences improvement initiatives into a prioritized, phased execution roadmap based on value, feasibility, and client constraints.

CONCEPT

SCOPE

PURPOSE

- ☐ Prioritize improvement initiatives based on value estimates, feasibility, and strategic fit.
- ☐ Sequence initiatives into implementation phases with clear and auditable rationale.
- ☐ Produce a client-ready roadmap draft for leadership review.
- ☐ Surface trade-offs and dependency conflicts for human resolution.

DESIGN PRINCIPLES / GUARDRAILS

- ☐ Always show prioritization rationale — never a black box ranking.
- ☐ Flag trade-offs and dependency conflicts explicitly.
- ☐ Never hard-code sequencing without human sign-off.
- ☐ Adapt phasing to client constraints and risk tolerance.
- ☐ Keep roadmap outputs structured for direct use in client presentations.

KPIS / SUCCESS MEASURES

Roadmap acceptance rate by team

80%+

Time to first roadmap draft

-65% vs. manual

Initiative sequencing accuracy

85%+

Trade-off flags resolved before client review

100%

DESIGN

HOW IT WORKS

5-step workflow

1 Ingest All Inputs

Load initiatives, value estimates, and client constraints.

↓ Retrieval layer

3 Apply Constraints

Adjust sequencing for timeline, resources, and risk tolerance.

↓ Constraint logic

5 Human Review

Team refines phasing, resolves trade-offs, and approves final roadmap.

↓ Human review + export

2 Score Initiatives

Rank on value, feasibility, dependencies, and strategic fit.

↓ Scoring and ranking engine

4 Draft Roadmap

Produce phased roadmap with rationale and initiative summaries.

↓ LLM + roadmap generation

INPUTS

5

- ▶ Approved improvement initiatives (from Agent 4)
- ▶ Value estimates and ranges (from Agent 5)
- ▶ Client constraints and timeline parameters
- ▶ Feasibility scores and dependency map
- ▶ Strategic priorities

OUTPUTS

5

- ◆ Prioritized initiative list with scores and rationale
- ◆ Phased implementation roadmap
- ◆ Trade-off and dependency flag report
- ◆ Rationale documentation per initiative

◆ Export-ready roadmap for client presentation

APPLICATION INTEGRATIONS

4

- ⇒ Value Modeling Agent (Agent 5) — Receives value estimates as primary scoring input
- ⇒ Future State Agent (Agent 4) — Pulls initiative dependency and build plan data
- ⇒ Internal knowledge base — Prior roadmap benchmarks and engagement learnings
- ⇒ Document export layer — PowerPoint roadmap / project plan export
